Engineering Services

Aircraft Specifications

Hangar/Workshop Specifications

Airport Specifications

Technical Support Services

GACS provides professional aviation technical support services in the following areas

Inspections -

- Aircraft factory in-production.
- Aircraft delivery/re-delivery.
- Aircraft/Engine lease in/lease return.
- Airport Apron/Runway.
- On site borescope.

Entry into service support -

Aircraft acceptance.

Line maintenance set up
Start up spares, Ground support equipment and tools provisioning.

On site Representation -

Aircraft/Engine/Component Manufacturer (OEM)
Aircraft/Engine MRO Supplier.

Valuation -

Aircraft (Used to buy or lease).
Engine (Used to buy or lease).

Contract negotiations -

Aircraft lease.
Engine lease.
Engine purchase.
Aircraft purchase

Engine repair/refurbishment work scoping.

Invoice reconciliation -

Engine repair/refurbishment against work scope.
Aircraft major check against work package.

Technical Support Services

Meet our Aviation Team

Mr Ephantus Kamau Mbogo

Mbogo has over 40 years experience in various roles in aircraft engineering and maintenance ranging from technician performing routine flight line and hangar floor tasks through licensed engineer undertaking defect rectification and certification and aircraft release certification to management positions as Manager Propulsion Systems, Manager Contracts and Head of Aircraft Production in a successful airline in the African continent. In these roles Mbogo was involved in engine selection, engine and APU on-wing and off-wing maintenance, engine and APU maintenance out-sourcing, aircraft, engines and component maintenance contracting, warranty administration, engine and aircraft maintenance invoice validation, and aircraft hangar and line maintenance planning and execution. Mbogo has very wide hands-on and management knowledge and experience gained both through training and working on aircraft airframes and propulsion systems in the airline.

Mr Dick Kabukuru Mutothori

Mutothori is an accomplished aviator with over 40 years experience accumulated in various roles in a successful mainstream airline in the African continent, an airline maintenance provider, a National Airworthiness authority where he was the second in command & directly responsible for the Flight Safety department & currently as an aviation maintenance consultant. Mutothori played a key role in the development of the national aviation policy & harmonization of aviation law. He has been involved in aircraft type certification processes ahead of new aircraft entry into the national register, developing training syllabi for maintenance personnel, examining & licensing maintenance personnel & crew, inspection & approval or otherwise of maintenance & training facilities. Mutothori has broad experience & training in the aviation industry.

Mr Naftaly Wanjohi Mwangi

Naftaly has over 35 years experience in various roles in aircraft engineering & maintenance starting as a Graduate Engineer trainee & rising through the ranks to become Manager Engineering Development, Manager Materials Logistics, Head of Technical Support & finally Head of Base Maintenance in a successful airline in the African continent. In these roles Naftaly was involved in aircraft selection & acquisition, BFE selection, aircraft in-factory production follow-up, aircraft delivery & phasing-in, aircraft re-delivery, development & revision service of maintenance documentation, custody of maintenance records, AD planning & compliance, development of local modifications & repair schemes, aircraft defect troubleshooting & repair, spares & tools planning, procurement & administration, aircraft hangar maintenance & aircraft, engines & components maintenance out-sourcing & in-sourcing, warranty administration, emergency response, etc. Naftaly has very wide hands-on & management knowledge & experience gained both through training & working in the airline.

Mr Samuel Mburu Muchai

Sam is a seasoned aviation professional with broad experience spanning over 40 years starting as a technician performing routine flight line & hangar floor tasks & rising through the ranks of licensed aircraft engineer/inspector involved in inspection, defect rectification & certification & aircraft release certification to become the Group Quality Assurance Engineer leading the hangar inspection team, Manager Quality Control & later the Head of Engineering & Quality organization in a successful airline in the African continent. In these roles Sam spearheaded the realignment of the Company Maintenance Exposition to the EASA requirements, design, development & implementation of a sound quality system, curriculum development, approval & execution of technical staff training, chaired panels that examined maintenance personnel for issuance of maintenance type approvals, issued & revoked type approvals for maintenance personnel, oversaw the smooth entry & exit of aircraft into the company fleet. Sam has very wide hands-on & management knowledge & experience gained both through training & working on aircraft airframe & propulsion systems in the Air Force & the airline.

Global Aviation Consulting Services Ltd

GACS works with Air Operators, Lessors and Aircraft Financiers, Manufacturers, Spares Distributors, Maintenance Providers to develop practical and effective solutions.
